International Wildlife Rehabilitation Council

Providing science-based education and resources
to wildlife rehabilitators and the public
to promote wildlife conservation and welfare.

APRIL COURSES IN WILDLIFE REHABILITATION!

The International Wildlife Rehabilitation Council will offer three classes in Victoria, BC this April for professionals looking to add to their formal education. The IWRC is a non-profit organization that offers training and support to professional wildlife rehabilitators—from large non-profit organizations to individual home rehabilitators.

COURSE 2: Feeding and Nutrition*

Description: Addresses the nutritional requirements of mammals and birds with principles applicable to reptiles and amphibians with lecture topics include: basic nutritional biochemistry, gastrointestinal physiology and anatomy, neonates, self-feeding process, importance of recognizing natural diets, determining nutritional requirements, feeding ill and emaciated animals, analyzing and formulating diets, minimizing captive stress through feeding and foraging enrichment. (8 Continuing Education Credits)

WHEN: April 7th, 2012, 12:00 PM-8:00 PM

HOW MUCH?: Member cost \$95 Non Member \$115

COURSE 3: Parasitology*

Description: All animals have parasites. Understanding them leads to better care of wildlife in rehabilitation and can reduce the spread of disease. Parasitology is a comprehensive course covering individual parasites, their life cycles, and their transmission to new hosts. In this course you begin to learn how to identify the diagnostic forms, the treatments to use and also the zoonotic potential for many varieties of parasites.

WHEN: April 8th, 2012, 12:00 PM- 8:00 PM

HOW MUCH?: Member cost \$95 Non Member \$115

Where: BC SPCA Victoria Shelter

3150 Napier Lane

Victoria, BC Canada V8T 4V5
